Volume of work per sector

Job prospects

- More than one in four construction industry workers is a carpenter-joiner. In 2016, 40,461 carpenter-joiners were active on Québec construction sites. This trade is also among those with the highest number of women, with 362 active female carpenter-joiners in 2016.
- Work volume is concentrated primarily in the institutional and commercial, and residential sectors. Activity in these sectors should decline slightly in coming years. More than 11,600 employers use the services of carpenter-joiners.
- There were 2,039 new apprentices in the industry in 2016, about 300 fewer than the average from 2012 to 2015, and 1,641 of these were graduates. During their first year of work in the construction industry, apprentices earn an average of \$17,600 for their work covered by collective agreements, while journeymen working at least 500 hours take home \$55,500 a year, on average.
- Job prospects for this trade are quite good, as high turnover is creating demand for new workers. Graduates find work very easily even though employment is declining slightly.
